## CONTENTS OF VOLUME 61

NUMBER 1, JANUARY 1985

P. KOOLE AND M. A. HEMMINGA. Analysis of the Saturation Properties of the In-Phase and Quadrature Second-Harmonic ESR Spectra of the Cholestan Spin Label in Oriented Lipid Multibilayers in the Gel Phase .....	1
UWE EWERT AND THOMAS HERRLING. Numerical Analysis in EPR Zeugmatography with Modulated Gradient .....	11
ROBERT T. C. BROWNLEE, MAXWELL J. O'CONNOR, B. PHILIP SHEHAN, AND ANTHONY G. WEDD. Applications of $^{95}\text{Mo}$ NMR Spectroscopy. XI. $^{95}\text{Mo}$ , $^{97}\text{Mo}$ , and $^{17}\text{O}$ Relaxation Times, Quadrupole Coupling Constants, and the Molybdenum Relaxation Mechanism in $\text{Mo}(\text{CO})_6$ .....	22
DAVID L. TURNER. Sensitivity of Two-Dimensional NMR Experiments for Studying Chemical Exchange .....	28
LAURANCE D. HALL, KEVIN HOLME, AND SUBRAMANIAN SUKUMAR. Measurement of Proton Spin-Lattice Relaxation Rates of Model Phantoms in Chemical Imaging .....	52
JIN-SHAN WANG AND TUCK C. WONG. An Improved Rapid Method for Heteronuclear Two-Dimensional $J$ Spectroscopy .....	59
M. RANCE, O. W. SØRENSEN, W. LEUPIN, H. KOGLER, K. WÜTHRICH, AND R. R. ERNST. Uniform Excitation of Multiple-Quantum Coherence. Application to Two-Dimensional Double-Quantum Spectroscopy .....	67
GARETH R. EATON AND SANDRA S. EATON. Relaxation Times for the Organic Radical Signal in the EPR Spectra of Oil Shale, Shale Oil, and Spent Shale .....	81
R. TYCKO, H. M. CHO, E. SCHNEIDER, AND A. PINES. Composite Pulses without Phase Distortion .....	90
PAUL R. ROSEVEAR, DAVID C. FRY, AND ALBERT S. MILDVAN. Temperature Dependence of the Longitudinal Relaxation Rates and Exchange Rates of the Amide Protons in Peptide Substrates of Protein Kinase .....	102
B. C. SANCTUARY. Multipole NMR. X. Multispin, Multiquantum, Multilinear Operator Bases .....	116
 NOTES	
AXEL HAASE. A New Method for the Decoupling of Multiple-Coil NMR Probes .....	130
M. J. COLLINS, U. R. K. RAO, AND G. J. SCHROBILGEN. $^{75}\text{As}$ NMR Study of $[\text{As}(\text{OTeF}_5)_6]^-$ in Solution .....	137
WILLIAM J. THOMA, LAVELL M. HENDERSON, AND KÂMIL UĞURBİL. Removal of the Broad Resonance in $^{31}\text{P}$ NMR Spectra of Intact Tissues .....	141

IAN M. ARMITAGE, DAVID C. DALGARNO, AND FRED E. DAVIS. CXP Low-Power Decoupler Modification for Multiple Phase Cycling Ex- periments .....	145
YOSHIHIRO KURODA, YASUHIRO FUJIWARA, AND KAZUHIRO MAT- SUSHITA. An Inexpensive Method for Performing $^{13}\text{C}$ -{ $^1\text{H}$ (noise), $^{15}\text{N}$ (selective)} Triple-Resonance Experiments with a Deuterium Lock .....	149
COMMUNICATIONS	
JOEL F. MARTIN AND CHAS. G. WADE. Chemical-Shift Encoding in NMR Images .....	153
G. MARIUS CLORE AND ANGELA M. GRONENBORN. Assessment of Errors Involved in the Determination of Interproton Distance Ratios and Distances by Means of One- and Two-Dimensional NOE Measure- ments .....	158
PETER L. RINALDI AND NICHOLAS J. BALDWIN. Selective Excitation and Sensitivity Enhancement of $^1\text{H}$ Resonances by Polarization Transfer from Low Gamma Quadrupolar Nuclei .....	165
MARCELINO L. BERNARDO, JR., PAUL C. LAUTERBUR, AND LEWIS KYLE HEDGES. Experimental Example of NMR Spectroscopic Imaging by Projection Reconstruction Involving an Intrinsic Frequency Di- mension .....	168
A. J. SHAKA, JAMES KEELER, M. B. SMITH, AND RAY FREEMAN. Spatial Localization of NMR Signals in an Inhomogeneous Radiofrequency Field .....	175
F. J. M. VAN DE VEN, C. A. G. HAASNOOT, AND C. W. HILBERS. Double- Quantum NOESY. Coupled Coherent and Incoherent Transfer of Magnetization .....	181
LAURANCE D. HALL, VASANTHAN RAJANAYAGAM, AND SUBRAMANIAN SUKUMAR. Chemical-Shift-Resolved Tomography Using Four-Di- mensional FT Imaging .....	188
BOOK REVIEWS	
<i>Phosphorus-31 NMR. Principles and Applications</i> . Edited by David G. Gorenstein .....	192
<i>Topics in Carbon-13 NMR Spectroscopy, Vol. 4</i> . Edited by George C. Levy .....	193
ANNOUNCEMENTS AND NEWS ITEMS .....	
NUMBER 2, FEBRUARY 1, 1985	
J. MARK BULSING AND DAVID M. DODDRELL. Multiple-Quantum Polariza- tion-Transfer Coherence Pathways in Liquids .....	197

W. R. HAGEN, D. O. HEARSHEN, R. H. SANDS, AND W. R. DUNHAM. A Statistical Theory for Powder EPR in Distributed Systems .....	220
W. R. HAGEN, D. O. HEARSHEN, L. J. HARDING, AND W. R. DUNHAM. Quantitative Numerical Analysis of <i>g</i> Strain in the EPR of Distributed Systems and Its Importance for Multicenter Metalloproteins .....	233
RICHARD BRAMLEY AND STEVEN J. STRACH. Zero-Field EPR of the Vanadyl Ion in Ammonium Sulfate .....	245
A. TORO-LABBE AND J. MARUANI. The Conformational Dependence of the Hyperfine Couplings of $\gamma$ Protons in $\pi$ Radicals .....	254
S. FERCHIOU AND C. GIESSNER-PRETTRE. Nonempirical Quantum-Mechanical Calculations of Contributions of Intermolecular Interactions to Nuclear Magnetic Shielding Constants. II. Applications to Conjugated Molecules	262
J. LOUNILA, P. DIEHL, Y. HILTUNEN, AND J. JOKISAARI. An Analysis of the NMR Data for Methyl Iodide and Methyl Fluoride in Liquid-Crystal Solvents Allowing for the Correlation between Vibration and Rotation	272
H. BARKHUISEN, R. DE BEER, B. J. PRONK, AND D. VAN ORMONDT. Partial Excitation in Electron Spin-Echo Envelope Modulation Spectroscopy	284
K. V. SCHENKER AND W. VON PHILIPSBORN. Optimization of INEPT and DEPT Experiments for Spin Systems with Hetero- and Homonuclear Couplings .....	294
AD BAX AND GARY DROBNEY. Optimization of Two-Dimensional Homonuclear Relayed Coherence Transfer NMR Spectroscopy .....	306
D. G. MCGAVIN AND W. C. TENNANT. EPR Study of High-Spin Ferric Ion in a Completely Rhombic Environment. $\text{Fe}^{3+}$ in $\text{CaWO}_4$ .....	321
NOTES	
VLADIMÍR MLYNÁŘÍK. Coupling Constants between Carbon-13 and Iodine-127 .....	333
R. NARDIN AND M. VINCENDON. Proton-Silicon-29 Two-Dimensional Chemical-Shift Correlation NMR Spectroscopy .....	338
CLIFFORD J. UNKEFER AND WILLIAM L. EARL. A Combination of Inadequate and Carbon-13 Saturation for Spectral Simplification ..	343
B. BLÜMICH AND I. TWESTEN. Numerical Investigation of Exchange in Stochastic NMR .....	349
B. BLUMICH AND H. W. SPIESS. Quaternions as a Practical Tool for the Evaluation of Composite Rotations .....	356
COMMUNICATIONS	
YISHAY MANASSEN AND GIL NAVON. A Constant Gradient Experiment for Chemical-Shift Imaging .....	363
PETER F. BARRON, ROBIN K. HARRIS, PAUL JONSEN, AND KENNETH J. PACKER. Assignment of Resonances in the High-Resolution $^{13}\text{C}$ NMR Spectrum of Solid Thallium(III) Acetate. Selective Excitation and Multifield Studies .....	371

CHRISTOPHER BAUER AND RAY FREEMAN. Decomposition of Proton NMR Spectra into Individual Spin Multiplets .....	376
ULLA B. SØRENSEN, HANS J. JAKOBSEN, AND OLE W. SØRENSEN. Pulse Sequence SEMINA-2 for Spectral Editing of $^{13}\text{C}$ - $^{13}\text{C}$ Couplings Observed via Double-Quantum Coherence .....	382
J. R. HAVENS AND D. L. VANDERHART. Multiple-Pulse Proton NMR of Pressure-Crystallized Linear Polyethylene .....	389
W. P. AUE, S. MÜLLER, AND J. SEELIG. Localized $^{13}\text{C}$ NMR Spectra with Enhanced Sensitivity Obtained by Volume-Selective Excitation	392

NUMBER 3, FEBRUARY 15, 1985

V. V. KHRAMTSOV, L. M. WEINER, S. I. EREMKO, O. I. BELCHENKO, P. V. SCHASTNEV, I. A. GRIGOR'EV, AND V. A. REZNIKOV. Proton Exchange in Stable Nitroxyl Radicals of the Imidazoline and Imidazolidine Series .....	397
MIRKO I. HROVAT, CHARLES G. WADE, AND SUSAN P. HAWKES. A Space-Efficient Assembly for NMR Experiments on Anchorage-Dependent Cells	409
MICHEL DECORPS, MICHEL LAVAL, SYLVIANE CONFORT, AND JEAN-JACQUES CHAILLOUT. Signal to Noise and Spatial Localization of NMR Spectra with a Surface Coil and the Saturation-Recovery Sequence .....	418
SEYMOUR H. KOENIG AND RODNEY D. BROWN III. Relaxation of Solvent Protons and Deuterons by Protein-Bound $\text{Mn}^{2+}$ Ions. Theory and Experiment for $\text{Mn}^{2+}$ -Concanavalin A .....	426
NIKOLAUS M. SZEVERENYI, AD BAX, AND GARY E. MACIEL. Magic-Angle Hopping as an Alternative to Magic-Angle Spinning for Solid State NMR	440
STEPHEN W. UNGER, THOMAS JUE, AND GERD N. LA MAR. Proton NMR Dipolar Relaxation by Delocalized Spin Density in Low-Spin Ferric Porphyrin Complexes .....	448
L. WERBELOW, J. P. MARCHAL, AND D. CANET. Indirect Determination of Proton Relaxation Times from Partial Nuclear Overhauser Enhancements of Carbon-13 Resonances. II .....	457
H. BARKHUISEN, R. DE BEER, W. M. M. J. BOVÉE, AND D. VAN ORMONDT. Retrieval of Frequencies, Amplitudes, Damping Factors, and Phases from Time-Domain Signals Using a Linear Least-Squares Procedure .....	465
B. GÜNTHER AND DAVID C. AILION. Nonadiabatic Effects on Rotating-Frame Dipolar Relaxation Time ( $T_{1D\rho}$ ) Measurements .....	482
GEORGE H. WEISS AND JAMES A. FERRETTI. The Choice of Optimal Parameters for Measurement of Spin-Lattice Relaxation Times. III. Mathematical Preliminaries for Nonideal Pulses .....	490
GEORGE H. WEISS AND JAMES A. FERRETTI. The Choice of Optimal Parameters for Measurement of Spin-Lattice Relaxation Times. IV. Effects of Nonideal Pulses .....	499

ROBERT T. C. BROWNLEE, MAXWELL J. O'CONNOR, B. PHILIP SHEHAN, AND ANTHONY G. WEDD. Applications of $^{95}\text{Mo}$ NMR Spectroscopy. XIII. Relaxation Times of Molybdenum Compounds .....	516
KENNETH R. METZ AND RICHARD W. BRIGGS. The Two-Dimensional Fre- quency-Domain Analysis of Nuclear Spin Relaxation Data. Simultaneous Measurements of Spin-Spin and Spin-Lattice Relaxation Times .....	526
NOTES	
BERND WRACKMEYER. $^{15}\text{N}$ , $^{119}\text{Sn}$ , and $^{207}\text{Pb}$ Nuclear Magnetic Resonance of Monomeric Tin(II) and Lead(II) Amides .....	536
M. ALBERT THOMAS AND ANIL KUMAR. Effect of Strong Coupling on Multiple-Quantum Filtering .....	540
STEPHEN G. WITHERS, NEIL B. MADSEN, AND BRIAN D. SYKES. Re- laxation of Individual Transitions in an AX Spectrum. Use of Inter- ference Terms to Separate the Dipolar and Chemical-Shift An- isotropy Contributions to the Relaxation of $^{31}\text{P}$ and $^{19}\text{F}$ Nuclei in Macromolecules .....	545
JULIE E. SCHEFFLER AND MILDRED COHN. Photo-Induced CIDNP of Nucleoside Triphosphate Analogs .....	550
COMMUNICATIONS	
DAVID NEUHAUS, JAMES KEELER, AND RAY FREEMAN. Investigation of Individual Proton Spin Multiplets by C $\rightarrow$ H Correlation Spec- troscopy .....	553
KEVIN M. BRINDLE, MICHAEL B. SMITH, BHEESHMA RAJAGOPALAN, AND GEORGE K. RADD. Spectral Editing in $^{31}\text{P}$ NMR Spectra of Human Brain .....	559
ROBIN K. HARRIS, KENNETH J. PACKER, AND PATRICK REAMS. High- Resolution Tin-119 NMR of Solid Trimethyltin Hydroxide .....	564
ZENON STARČUK AND VLADIMÍR SKLENÁŘ. New Hard Pulse Sequences for the Solvent Signal Suppression in Fourier-Transform NMR. I	567
THOMAS M. GRIST AND JAMES S. HYDE. Resonators for <i>in Vivo</i> $^{31}\text{P}$ NMR at 1.5 T .....	571
JAMES D. OTVOS, HELEN R. ENGESETH, AND SUZANNE WEHRLI. Mul- tiple-Quantum $^{113}\text{Cd}$ - $^1\text{H}$ Correlation Spectroscopy as a Probe of Metal Coordination Environments in Metalloproteins .....	579
AUTHOR INDEX FOR VOLUME 61 .....	585

The Subject Index for Volume 61 will appear in the December 1985 issue as part of a cumulative index for the year 1985.

## Information for Authors

The *Journal of Magnetic Resonance* includes papers dealing with the theory, techniques, methods of spectral analysis and interpretation, spectral correlations, and results of magnetic resonance spectroscopy and related fields. The Editor seeks the assistance of expert referees in the evaluation of manuscripts of articles, but he alone is responsible for the final decision concerning acceptance.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Magnetic Resonance* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**A signed photocopy of the copyright assignment form which appears following this "Information" should be submitted to the Editor along with each manuscript. (This form will not be binding if the manuscript is not accepted for publication in the *Journal of Magnetic Resonance*.)**

Fifty reprints of each paper are supplied without charge, and additional reprints may be ordered on a form that is sent to the authors with the proofs that the authors receive. The journal *assesses no page or publication charges*.

All manuscripts and books for review should be sent to the Editor, **Wallace S. Brey, Department of Chemistry, University of Florida, Gainesville, Florida 32611.**

### Form of the Manuscript

Manuscripts should be submitted in triplicate. The original typewritten copy should be supplied; printout from a computer is acceptable only if it is of "letter quality." All typing must be double-spaced, including references, footnotes, and figure captions, on one side of paper approximately  $22 \times 28$  cm (8.5  $\times$  11 in.). Each page of the manuscript should be numbered. If the paper is lengthy, it may be divided into sections, but the sections should not be numbered. The first line of each paragraph is indented.

*Cover Page.* The first page contains the article title, the author's name, the laboratory where the work was done, and the address of the laboratory. At the bottom of this page should appear any footnotes to the title (indicated by superscript \*, †, ‡).

*Abstract.* The second page of the manuscript for each regular paper should contain an abstract of 50–200 words, summarizing the nature and results of the research described. The abstract must be completely self-contained, having no references to items appearing in the body of the manuscript.

*Equations, Symbols, and Abbreviations.* Mathematical equations and symbols must be typewritten wherever possible. Equation numbers are given in square brackets to the right of the equation, and references in the text to equations should be in the form "Eq. [3]." Greek letters may be identified in pencil in the margin. Other nonstandard mathematical symbols should be clearly identified, in a separate list if necessary. Symbols for vectors and tensors should be clearly marked. The
